

PTU51 - Ultrasonic level transmitter

0139

Servicies

After sale servicies

Ordinary and extraordinary maintenance, installation, staff training, spare parts, calibration and calibration for measuring instruments.

Product description

Non-contact level measurement

Non-intrusive level measurement systems are the preferred technology for many applications and for this reason SGM-LEKTRA developed

the level/distance transmitters PTU51. These units are compact with a unique simplicity of commissioning. Calibration and transmitter configuration is possible, even remotely, thanks to a MODBUS RTU connection together with the related software for the PC, or via VLW90M

/ VLW60T display unit. The IP68 transmitter protection allows installation in underground wells.

Suitable for liquids measurement and granulates
