## Product description

VLW90M, a single unit suitable for different applications. Level measurements, difference between levels, open channel flow (hydraulic jump) and pumps control. Different measurement functions directly settable via the keyboard. VLW90M can be connected to ultrasonic sensors and/or to 4-20mA level transmitters. VLW90M has been developed for the connection to 1 or 2 MODBUS sensors, but it can support up to 8 PTU, METER, RPL81 or KTU units if externally powered. A remarkable note is the data logger on removable pen-drive, which enables the total traceability of the measurements. It is particularly suitable for the analysis of the flow rate timing in open channel applications.

## General Features

<b>Data logging</b>	via Pen Drive USB	<b>Output</b>	2 analog output 4÷20mA, 2 open collector digital output
<b>Input signals</b>	2 analog input 4÷20mA; 2 digital input (max. 24Vdc 10mA)	<b>Input signals</b>	2 analog input 4÷20mA; 2 digital input (max. 24Vdc 10mA)

## Models and prices

Model ref.	Version	Price VAT escl.
VLW90M2C1B1A	With data logger	799.00 €
VLW90M4C1B1A	Standard without data logger	734.87 €
