Product description

The Testo 883 Thermal Camera is the ideal tool for maintenance workers, facility managers, and energy consultants. With an infrared resolution up to 640x480 pixels and a NETD of 40 mK, this device offers high-quality images for detecting thermal anomalies in buildings and installations. Thanks to the Testo IRSOFT software and the Testo SiteRecognition function, the management and analysis of thermal images are simplified and automated. Users can also control the thermal camera via smartphone or tablet through the Testo Thermography App.

For greater ease of use, the device can be operated via touchscreen and joystick and allows for wireless data transmission. Also excellent for professional reports, the thermal camera is easy to handle and flexible in use.

General Features

Dimensions	171 mm x 95 mm x 236 mm	Resolution	320 x 240 pixel
Temperature	Operating temperature -15 to +50 °C	Power	Lithium-ion battery, fast charging, field replaceable
Memory	Internal Memory (2.8GB)	Max measure range	from -30 to +650°C
Max measure range	from -30 to +650°C
