Product description

The Testo 868s thermal camera is your indispensable tool for quick and accurate thermography. Designed for craftsmanship and industry, this thermal camera allows you to easily locate leaks, detect overheated connections, and identify defects.

With innovative features like IFOV Indicator and ScaleAssist, you will obtain high-precision thermal images without errors. The device is also WiFi-ready, enabling you to connect to your mobile devices for simplified communication and efficient workflow. Use the Testo Thermography App to compile and send field reports directly from your smartphone or tablet.

The thermal camera offers high resolution at 160x120 pixels, expandable to 320x240, for detailed thermography. An integrated digital camera and automatic hot/cold point detection add further layers of detail and precision.

Complete with a WiFi module, USB cable, professional software, and other accessories, the Testo 868s thermal camera is your reliable partner for quick and safe maintenance.

In this way, I have tried to maintain the most relevant information for the consumer, emphasizing the features and benefits of the product, while keeping the language straightforward and direct.

General Features

Resolution	320 x 240 pixels
