

## ***Thermometer strips - Testo***

0179

## ***Services***

### **After sale services**

Ordinary and extraordinary maintenance, installation, staff training, spare parts, calibration and calibration for measuring instruments.

## Product description

The Testoterm thermal strips are self-adhesive, temperature-sensitive films that change color when specific temperature thresholds are exceeded. Ideal for long-term temperature monitoring in various environments like warehouses, transport, labs, automotive technology, and aerospace. These strips come in a 10-piece pad, easily peel off, and attach to the object you want to monitor. The strips change color within 2-3 seconds when a set temperature is surpassed. This color change is permanent, allowing for long-term tracking of critical temperature fluctuations. Perfect for monitoring small or moving objects without the need for complex equipment.

## General Features
