## **Product description**

Material Thickness Gauge with Integrated Memory, Ultrasound Velocity Adjustment, and ISO Calibration

This material thickness gauge measures up to 300.0 mm, enabling precise thickness measurements on various homogeneous materials such as steel, aluminum, zinc, silver, and gold. It features a built-in customizable limit value alarm function. The device can visually indicate and even emit an audible signal when the measured value exceeds the set limits, making it valuable for quality control and material entry checks.

The integrated memory stores measured values, which can be easily retrieved and displayed graphically for analysis. The gauge also includes an ISO calibration report to ensure measurement accuracy.

## **General Features**

Dimensions	163mm x 82mm x 38mm	Weight	320g
Resolution	0,01 mm per <=99,99 mm	Resolution	0,1 mm for >=100,0 mm
Range	1,00 300,0 mm	Power	3 x 1.5 V AA batteries
Detector	PCE-TG 5M10d probe	Memory	1500 values
Precision	±0.5% of value + 0.05 mm	Precision	±0.5% of value + 0.05 mm
