Product description

The PCE-DFG N 10-ICA digital dynamometer is a high-precision device for tensile and compression tests up to 10 N. With a sampling frequency of 1600 Hz and a resolution of 0.005 N, it provides accurate measurements. Its large backlit display allows for easy reading of values, while the USB interface and included software enable data transfer and analysis on a PC. With a rechargeable internal battery, it offers up to 10 hours of autonomy. Ideal for quality control, material monitoring, and component production. ISO certification included.
