AgiLeak

0255

Servicies

After sale servicies

Ordinary and extraordinary maintenance, installation, staff training, spare parts, calibration and calibration for measuring instruments.

Product description

The AgiLeak is a next-generation device with a transparent plexiglass housing connected to a touch control box. It measures the resistance of seals under vacuum and detects leaks locally in various types of packaging (flexible, semi-rigid, and rigid). This ultra-fast test is indispensable in many industries, such as cosmetics, pharmaceuticals (to ensure product sterility), food processing (for food safety), and aerospace (to guarantee the integrity of electronic products).

The prices could be not always up to date and they don't take into account any promotional sale on the e-commerce.

General Features

Temperature	From 0°C to +40°C	**Approvals**	Calibration certificate
Capacity	-830 mBar	**Vacuum**	Compressed air network (venturi)
Application	Leak test	**Air filter**	5 ?m
Air filter		**System connection**	1 x USB / 1 x ETHERNET
System connection		**Communication**	Printer, RS232, TCP-IP, CSV Export, XML USB Key, open communication protocol
Communication	Stampante	**Communication**	RS232
Communication	TCP-IP	**Communication**	Esportazione CSV
Communication	XML Chiave USB	**Communication**	protocollo di comunicazione aperto
Number of programs	Unlimited	**Number of tests**	Unlimited
Test duration	Unlimited	**Data traceability and integrity**	User rights Automatic backup and data tampering protection Connectivity with SPC and ERP software Audit trail
Data traceability and integrity	User rights Automatic backup and data tampering protection Connectivity with SPC and ERP software Audit trail
