

AgiLeak-P

0256

Servicies

After sale servicies

Ordinary and extraordinary maintenance, installation, staff training, spare parts, calibration and calibration for measuring instruments.

Product description

The AgiLeak is a new generation device with a transparent plexiglass housing connected to a touch control box. Measures the strength of vacuum welds and allows leakage to be detected locally in many types of packaging (flexible, semi-rigid and rigid). This ultra-fast test seems to be indispensable in various sectors of activity such as cosmetics, pharmaceuticals (to ensure the sterility of products), food processing (food safety), aeronautics (to ensure the integrity of electronic products).

General Features

Temperature	From 0°C to +40°C	Approvals	Calibration certificate
Capacity	-950 mBar	Vacuum	Vacuum pump supplied
Application	Leak test	Housing dimensions	L160 x P350 x A240 mm
Housing dimensions		Screen	7" capacitive touch screen
Sampling frequency	Maximum 1500 hz	Communication	Printer, RS232, TCP-IP, CSV Export, XML USB Key, open communication protocol
Communication	Stampante	Communication	RS232
Communication	TCP-IP	Communication	Esportazione CSV
Communication	XML Chiave USB	Communication	protocollo di comunicazione aperto
Communication	protocollo di comunicazione aperto
