Ordinary and extraordinary maintenance, installation, staff training, spare parts, calibration and calibration for measuring instruments.

## Product description

The ATS Pneumatic Tester for tube sealing allows testing of heat-sealed plastic and metal tubes, doypacks, pouches, and other packaging directly on the production line or in the laboratory. Why test the sealing? During heat sealing, defects can occur due to electrode temperatures, material thickness, or the presence of impurities. The sources of defects in this process are numerous, making the implementation of reliable testing as close as possible to the production line essential. This is a fast, simple, cost-effective, and fully reliable test used by many packaging manufacturers.

## General Features

<b>Dimensions</b>	L300 x W200 x H280 mm	<b>Weight</b>	10 kg
<b>Power</b>	Compressed air from 0 to 10 bar	<b>Capacity</b>	1000N
<b>Vacuum</b>	Compressed air network	<b>Application</b>	Leak test
<b>Crush tube</b>	Crushes PVC tube on rigid metal frame, transparent polycarbonate	<b>Reading</b>	Class 1.6 pressure gauge (accuracy of 1.6% of full scale)
<b>Pressure force</b>	Da 50 a 1000 N	<b>Time delay</b>	Adjustable from 0 to 30 seconds Delay at +/- 1 second
<b>Power connection</b>	Connection to compressed air network via Rislan tube with an outer diameter of 8 mm	<b>Pressure adjustment</b>	Pressure regulator adjustment knob
<b>Pressure adjustment</b>	Pressure regulator adjustment knob		

The prices could be not always up to date and they don't take into account any promotional sale on the e-commerce.
