Product description

The PouchTube Tester allows testing the sealing strength of tubes, pouches, and other flexible packaging directly on the production line or in the laboratory. It can be used as a replacement for ATS tube seal testers. During heat sealing, defects may occur due to electrode temperature or the presence of impurities. By performing a crush test, you can verify the integrity of your sample's seal and ensure the absence of leaks or micro-leaks.

General Features

Capacity	1000N	Vacuum	Compressed air network
Application	Leak test	Touch screen	Intuitive interface designed to be operational in less than 5 minutes without manuals
Compliance standards	Compliant with ASTM and ISO standards QC/QI/QO/QP/QM available	Self-diagnosis	Self-diagnosis capability (sensor drift, etc.)
Pressure sensor	Pressure sensor accurate up to 1N	Pressure sensor	Pressure sensor accurate up to 1N
