

## ***Compresspack L1600***

0267

## ***Servicies***

### **After sale servicies**

Ordinary and extraordinary maintenance, installation, staff training, spare parts, calibration and calibration for measuring instruments.

## Product description

The CompressPack is used to verify the seal integrity of plastic or metal packaging, such as doypacks, doypack refills, pouches, bags, and tubes, directly on the production line or in the laboratory. It can be used alongside ATS tube welding testers.

Why test welds? During hot welding, defects can occur in the weld due to electrode temperatures and the presence of impurities. Performing a compression test ensures the integrity of the sample's weld, confirming the absence of leaks or micro-leaks. This test is crucial to validate the proper sealing of samples.

## General Features

<b>Battery life</b>	Long-lasting rechargeable battery (more than 24 hours )	<b>Memory</b>	4 GB internal (expandable to 64 GB with uSD)
<b>Capacity</b>	16000 N at 6 bar	<b>Display</b>	Large 4.3" color touch screen display
<b>Vacuum</b>	Compressed air network	<b>Application</b>	Leak test
<b>Application</b>	Noise Studio Web and Desktop applications for data management and analysis	<b>Design</b>	Ergonomic design for one-handed operation in challenging environments
<b>User interface</b>	Intuitive user interface with smartphone-like gestures	<b>Wireless connectivity</b>	Data transfer and remote control (TBA)
<b>Interfaces</b>	Wi-Fi, LAN, USB-C, RS232/485	<b>Interfaces</b>	Wi-Fi, LAN, USB-C, RS232/485
