

Tiger XT - VOC Detector

0033

Servicies

After sale servicies

Ordinary and extraordinary maintenance, installation, staff training, spare parts, calibration and calibration for measuring instruments.

Rental

If you need this product occasionally, renting may be the most convenient solution for your business.

The prices could be not always up to date and they don't take into account any promotional sale on the e-commerce.

Product description

The Tiger XT COV detector is a portable device that quickly and accurately identifies volatile organic compounds (VOCs) even in the most challenging conditions. Its PID technology, enhanced by the patented Fence Electrode technology, is recognized for speed, accuracy, and resistance to humid and polluted environments. Its broad measurement range spans from 1 ppb to 20,000 ppm. It offers a response time of just two seconds and can identify over 750 VOCs, making it ideal for precise VOC detection.
