Product description

The TIGER XT SELECT detector is a portable tool for the rapid detection of benzene and total aromatic compounds (TAC). With two operating modes, it provides precise data on exposure limits of 15 minutes and 8 hours. It offers real-time measurements with accuracy up to parts-per-billion (ppb) levels and can detect VOCs like benzene up to 1 ppb.

Its safety is ensured by the semiconductive rubber material of its casing. The package includes the detector, a rechargeable battery, charger, supports, pre-filter tubes, manual, various tools, and accessories.
