

***Falco - Fixed VOC detector***

0035

## ***Servicies***

### **After sale servicies**

Ordinary and extraordinary maintenance, installation, staff training, spare parts, calibration and calibration for measuring instruments.

## Product description

FALCO is an advanced fixed detector for volatile organic compounds (VOCs) with continuous detection capability. It features Typhoon Technology that protects against condensation and the patented Fence Electrode technology to counteract the effects of humidity, ensuring precise measurements even in extreme conditions. It is designed for safety, with an externally intrinsic safety sensor and dual certification, allowing for maintenance in hazardous areas. Outputs are standardized and configurable for various alarms. It is ideal for extreme weather conditions, offers four measurement ranges, reduces maintenance costs, and provides various response options. The display is visible up to 20 meters away, and its lamp lasts approximately two years. The kit includes the detector, a magnetic actuator, and a calibration adapter.

## General Features

<b>Dimensions</b>	H:200 mm L:190 mm P:125 mm	<b>Response time</b>	< 30 sec.
<b>Temperature</b>	da -40°C a 60°C	<b>Temperature</b>	da -40°C a 60°C
