Product description

Ion Science calibrated leaks ensure accurate and reliable leak detection through a testing system. Suitable for various gases like helium, SF6, and refrigerants, these leaks comply with ISO 9001:2008 standards and are housed in stainless steel for durability and corrosion resistance. Easily interchangeable, they work seamlessly with CalCheck, a user calibration tool, allowing for multiple leak rate calibrations with a single device. Each leak comes in its case with a calibration certificate. Ideal for ensuring the highest standards in leak detection and testing.

General Features
